

Sight Reading 2020

Instructions:

1. You may practice this as much as you would like before recording your audition. When you go to record, you may only use one take for the entirety of the sight reading (ie do not stop the video between lines).
2. You will receive one point for each line that you sing correct pitches and rhythms. You do not need to attempt all three lines.
3. You may choose to use solfege, or just sing on a neutral syllable [da] [la].
4. You may choose your starting note and tempo.
